

FLCC Accessibility Statement & Resources

Accessibility is proactively implementing appropriate and necessary measures, beyond ADA and section 504 compliance, to ensure students, faculty and staff have access to all programs, activities, physical spaces, content and materials.

Finger Lakes Community College is committed to providing its employees and students equal access to all programs, services and activities. We are striving to make our working and learning environments accessible to the widest possible audience, regardless of ability or means of access, and will ensure that campus resources are accessible in accordance with applicable laws. We recognize that accessibility is an ongoing process and is the responsibility of all administrators, faculty, and staff, which necessitates having a statement that supports this notion. We are dedicated to providing reasonable, innovative solutions that provide equal and effective access that meet the diverse needs of our community.

While national laws set a framework and mandatory expectation of what content should look like when created using public funds, it lacks the connection to FLCC's mission, vision, and culture. Therefore the aforementioned statement is a clear testament of how FLCC as an institution does more than just the bare minimum of what is required under law in an equitable fashion. As an institution of higher learning, it's imperative to have an accessibility statement that is inclusive of all populations, reinforcing to ALL that *"you are welcome here."* Therefore, in support of Diversity, Equity and Inclusion, FLCC recognizes and will continuously work to support training around developing and updating materials in order to be fully accessible, offering opportunities via the CTL, DEI initiatives, and professional development days (Interconnectedness).

If you have questions, comments, suggestions, or need assistance around access to the following areas please contact the relevant offices as listed below:

- **Campus Wide**
